

Foaming and Frothing Behavior of Green Surfactants and Fine Particulate Systems

Research Team: Jun Wu, Irina Chernyshova Prof Somasundaran, Angelina Georgieva, Parvesh Sharma and Brij Moudgil

Overview: Greener surfactant systems for desired foamability and foam stability; defoaming by hydrophobically modified particles

Technical Information: Characterization and comparison of foamability and foam stability between greener surfactants and their mixtures with conventional ones

Industrial Relevance: Personal Care Industry
